

BD FACSCelesta2

General Information

The BD FACSCelesta is a high-speed, multi-color, digital analyzer.

The FACSCelesta 2 is equipped with three lasers (405nm-488nm-561nm) that can detect up to 12 different colors (see the below chart).

Samples are acquired using the BDFACSDiva 8.0.1.1 software and pulse processing (height, width and area) can be measured on all the parameters.

Samples are saved as FCS3.0 and FCS3.1 files.
